Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person-having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

2. Claims 1-5, 7, 8 and 10-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bischoff et al. (U.S. Patent No. 6,016,436) in view of Hoff (U.S. Patent No. 5,522,872).

In regards to claim 1, Bischoff discloses the system substantially as claimed comprising: a component 128 including a surface and a groove 132 formed in the surface; a conductor 130 extending within the lead and including a portion positioned within the groove of the component (col. 2, line 67 – col. 3, line 7; col. 3, lines 46-60; figs. 2 and 3). Bischoff fails to disclose a resistance weld formed between the conductor and the component.

However, Hoff teaches a resistance weld formed between the portion of the conductor and the component (col. 17, lines 17-23).

Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention to modify the system of Bischoff by incorporating resistance welding as taught by Hoff in order to provide an electrical connection between the conductor and the component.

In regards to claim 2, Bischoff discloses wherein the surface has a curved profile (col. 3, lines 46-60).

In regards to claim 3, Bischoff discloses wherein the component comprises a substantially tubular body and wherein the surface is an inner surface of the substantially tubular (col. 3, lines 46-60).

In regards to claim 4, Bischoff discloses wherein the surface of the component forms an outer diameter (col. 3, lines 46-60).

In regards to claim 5, Bischoff discloses wherein the surface of the component forms an inner diameter and the component further includes an outer electrode surface (col. 3, lines 46-60).

In regards to claim 7, Bischoff wherein the conductor is a cable (col. 1, lines 52-57).

In regards to claim 8, Bischoff wherein the conductor is a coil (col. 1, lines 52-57).

In regards to claim 10, Bischoff wherein the groove extends approximately transverse to a longitudinal axis of the component (col. 3, lines 46-60).

Application/Control Number: 10/717,721

Art Unit: 3766

In regards to claim 11, Bischoff comprising: a component including a surface having a curved profile and a groove formed in the surface; a conductor extending within the component and including a portion positioned within the groove of the component, the groove spiraling about a portion of a circumference of the surface; and a resistance weld formed between the portion of the conductor and the component (col. 3, lines 46-60).

In regards to claim 12, Bischoff wherein the groove includes an approximately semi-circular cross-section (col. 3, lines 46-60).

Allowable Subject Matter

3. Claims 15-25 are allowed as stated in prior office action. Claims 6, 9, 13 and 14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shevon Johnson whose telephone number is (571) 272-2010. The examiner can normally be reached on M-F (8 a.m. - 4:30 p.m.).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Pezzuto can be reached on (571) 272-6996. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
